SUMMARY:

Senior Software Engineer with 5+ years of experience building scalable cross-platform mobile and web applications across FinTech, Bitcoin, AI, and social media domains. Proficient in React Native, React.js, and Node.js with hands-on experience in end-to-end product delivery from architecture and development to CI/CD pipelines and App Store releases. Delivered production-grade applications, including an open-source self-custody Bitcoin wallet, an AI-powered sports platform, and a geo-based social media app.

Experience:

Senior Software Engineer, [CakeSoft Technologies Pvt. Ltd.](#) | Pune, M.H. | 07/2024 - Present

- Led mobile and web development across multiple Bitcoin-domain products in a startup environment, gaining deep exposure to self-custody wallets, RGB asset protocols, and merchant payment platforms.
- Built and shipped features for Bitcoin Keeper (React Native), an open-source self-custody Bitcoin wallet, including hardware signer support, remote transaction signing, and crypto swap integrations.
- Developed Orbis1 Accounts (React.js, Node.js, MongoDB), a merchant-facing platform for RGB-protocol USDT payments on Bitcoin, handling both frontend and backend architecture.
- Managed end-to-end app deployments and backend service releases across Android and iOS platforms.

Software Engineer, [Valere Labs Pvt. Ltd.](#) | Pune, M.H. | 06/2022 - 07/2024

- Delivered two consumer-facing mobile applications from feature development through Store releases.
- Built and optimized core product features, including AI chatbot integration, video systems, and geo-based content discovery for social media app.
- Collaborated closely with design and product teams to deliver performant, user-centric mobile experiences.
- Recognized with the Magic Moments Award for exceptional delivery of the HypeX app.

Assistant System Engineer: [Tata Consultancy Services](#) | Pune, M.H. | 11/2020 - 05/2022

- Worked on a client-facing application for SSGA, contributing to feature development and production support.
- Delivered sprint-based features in an Agile environment, collaborating with cross-functional teams.

Projects:

[Orbis1 Accounts](#) | React.js, Node.js, MongoDB, TanStack Query, GitHub Actions

Platform: Web — MERN Stack

- Built a merchant-facing dashboard and developer portal for managing RGB-USDT payments on the Bitcoin network.
- Developed a scalable Node.js/Express backend with MongoDB for account, payment, and transaction management.
- Implemented RGB wallet syncing to maintain real-time consistency between MongoDB state and on-chain RGB asset data.
- Set up CI/CD pipelines using GitHub Actions for automated builds and deployments.

[Bitcoin Keeper](#) | React Native, Node.js, Redux-Saga, RealmDB, Fastlane CI/CD, Push Notifications, NFC

Platform: Android & iOS (Open Source) | [bitcoinkeeper.app](#)

- Integrated hardware signers (TwentyTwo Portal, Krux, Coldcard Q) with remote key sharing and transaction signing capabilities.
- Built an encrypted cloud backup/restore and multi-user vault management for secure Bitcoin storage.
- Developed concierge support and managed end-to-end app store releases using Fastlane.

[AthesAI](#) | React Native, Zustand, SSE, React Native FFMPEG, MixPanel

Platform: Android & iOS

- Reduced media load times and improved user engagement by implementing image and video asset caching.
- Integrated AI chatbot using Server-Sent Events (SSE) for real-time streaming interactions.
- Optimized video upload pipeline using FFMPEG, achieving approximately 60% of Instagram's upload performance benchmark.
- Implemented MixPanel analytics and SSO-based authentication for improved user tracking and onboarding.
